

SHIB POWER (\$SPOW) WHITEPAPER

Introduction

Shib Power Token is a community-driven, decentralized cryptocurrency project built initially deployed on the BSC blockchain. The purpose of this whitepaper is to provide a detailed overview of Shib Power Token, including its tokenomics, use cases, and roadmap, and the upcoming Shibarium ecosystem we are part of, which includes building a launchpad aggregator and NFT marketplace.

Tokenomics

The total supply of Shib Power Token is capped at 1 trillion tokens, with no plans for minting additional tokens in the future. Of the total supply, 50% will be burned to increase the token's value and ensure a deflationary supply model. The remaining 50% of the tokens will be distributed as follows:

- 15% will be sold during the token sale to raise funds for development and marketing efforts.**
- 10% reserved for liquidity pool**

- 5% will be reserved for the development team, locked for a period of 12 months, and then vested over a period of 24 months.
- 20% will be used for partnerships, bounties, and other community-driven initiatives.

Token Utility

Shib Power Token will serve as the primary utility token within the Shib Power ecosystem. Holders of Shib Power Token will be able to use it to:

- **Participate in governance:** Shib Power Token holders will be able to vote on proposals and decisions related to the Shib Power ecosystem, including upgrades, changes to tokenomics, SHIB burn and new initiatives.
- **Stake and earn rewards:** Shib Power Token holders will be able to stake their tokens to earn rewards in the form of additional tokens. This incentivizes long-term holding and reduces selling pressure on the market.
- **Access discounts and perks:** Shib Power Token holders will have access to discounts on fees, exclusive products, NFTs, Launchpad fees and other perks within the Shib Power ecosystem.

Shibarium Launchpad Aggregator
